Claims 1-3 and 17-30 are presented for examination.

The amendments and remarks filed on December 6, 2007 have been received and entered.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 17-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Simpkins et al. (US 5,972,923).

Simpkins et al. teach the use of polycyclic phenolic compounds, such as quercetin and kampferol for the treatment of conditions associated with neuron loss such as Alzheimer's. See column 5, lines 10-12 and column 5, lines 39-42. The above reference makes clear that the claimed method of use is old and well known.
